PROJECTS

Resume Builder

Tech Stack: React.js, Node.js, Express.js, MongoDB, Tailwind CSS

- Engineered a full-stack web application using the MERN stack, enabling users to seamlessly generate and export professional resumes.
- Built a responsive React frontend styled with Tailwind CSS, featuring complex dynamic form state and real-time document previews.
- Architected a Node.js and Express REST API backed by MongoDB to securely handle user sessions and persistent resume storage.

AI Debugger Assistant

Tech Stack: Next.js, TypeScript, Node.js, Express.js, Python, FastAPI, LangChain, ChromaDB, MongoDB, Docker, GitHub API, OpenAI API

- Built an AI debugging tool with a RAG pipeline and GitHub OAuth to analyze stack traces and errors directly against a user's codebase.
- Engineered a FastAPI and ChromaDB backend to generate vector embeddings across 15+ languages and deliver LLM-powered root cause analysis via OpenRouter.
- Automated the deployment of code fixes by utilizing the GitHub API to generate unified diff patches and open pull requests directly to user repositories.
